

RMU

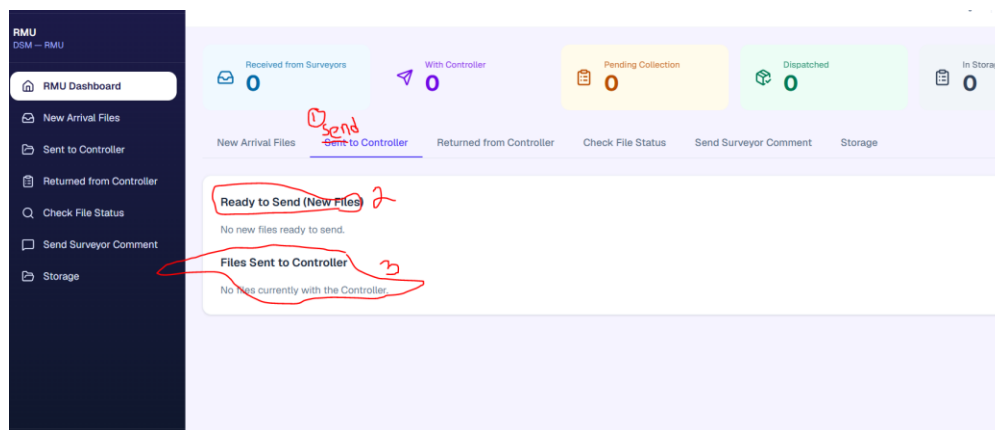

1.

Here we Don't find. We Add new Arrivals

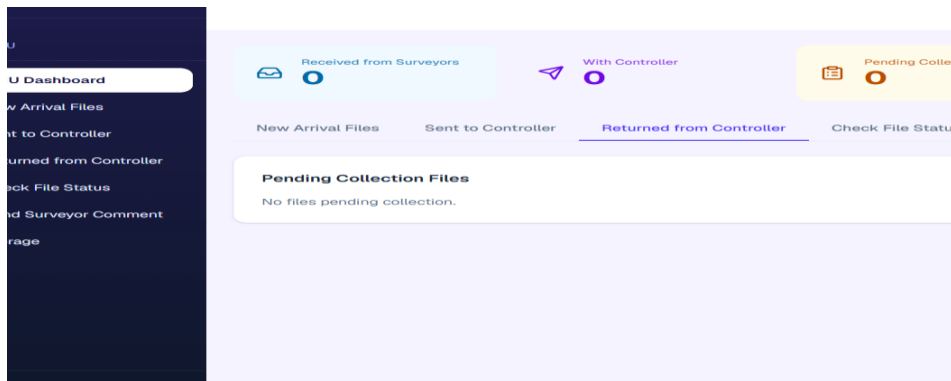

- Since we already have file information from Lot Number request, we just punch its SR number and if the SR number is correct, it will also require you to Add Receipt Number, If the Receipt number is correct it will now activate button to Add or Receive. (Please make the receipt number to accept any number for now)

2.

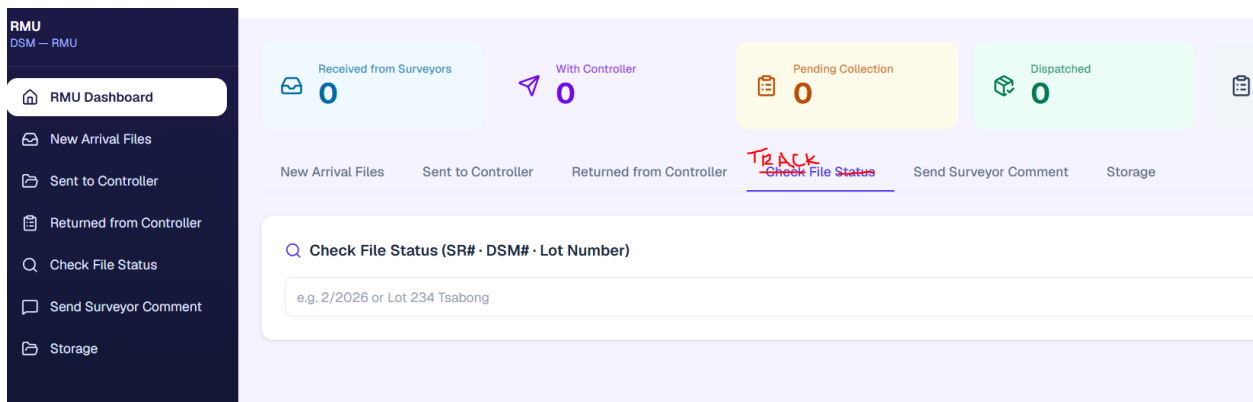

- Send to Controller**
- Ones the pile is added at 'New Arrival Files' it automatically appears at 'Ready to Send'**
 - It will show a list of all files ready to be sent. Maybe at the end of each file they will be a send button. Ones you click it, the files will now appear at the Controller's 'Received From RMU'
- I think this should appear under the reports. RMU must be able to query their report and be able to filter according to how they want.**

3

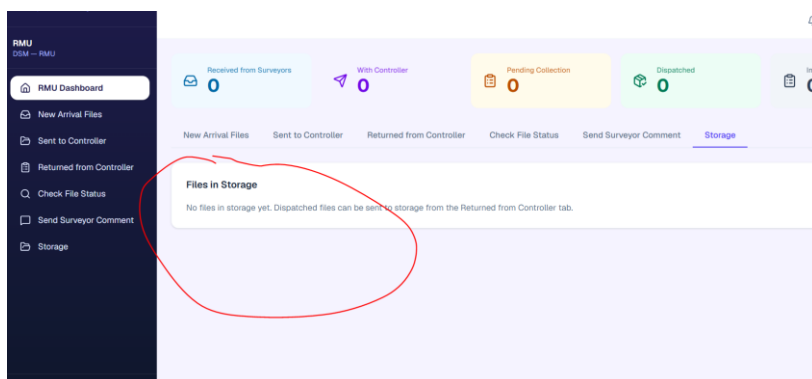

- i. Ones the surveyor collects, the Officer enter surveyor registration number and click collected
At the surveyor's portal, it should show under 'received from RMU'

4.

Track File

- i. 'To Storage'

Ones file are approved , the are sent to storage office. That where the scan files and store them online and store hard copies safely. Remember we added Storage user few days ago.
